

LITHIUM BATTERIES UPDATED ACCORDING TO THE IATA DGR 54th EDITION

DHL – Restricted Commodities Group

DEFECTIVE / DAMAGED BATTERIES

DHL will **NOT** accept any shipment with lithium batteries (ion or metal) that are **confirmed or suspected** to be defective* and/or damaged (*regardless of how the condition is and in any quantities*), recalled by the battery supplier/manufacturer and waste meant for recycling or disposal purposes (in any condition).

**A defective battery may not exhibit any damage at all!*

Any equipment packed with or containing lithium batteries (in particular equipment returned for repair purposes as part of reverse logistics/service parts program) exhibiting above mentioned condition, must have the **batteries removed** from the equipment in order to be accepted for carriage in DHL.

2013 LITHIUM BATTERIES REGULATIONS

An accompanying “**Transport Document**” is required for all shipments containing lithium batteries in Section IB and most of Section II.

See the document under the following link:

[**Transport Document**](#)

Lithium battery shipments must be accompanied by a **Material Safety Data Sheet** if shipped to/within/from Asia.

Transport Document for Lithium Batteries in Section IB and II

| | |
|----------------------------|------------|
| Air Waybill / HAWB: | |
| Shipper: | Consignee: |
| | |
| | |

WARNING: LITHIUM BATTERIES THAT HAVE BEEN RECALLED BY THE MANUFACTURER FOR SAFETY REASONS MUST NOT BE SHIPPED BY AIR.

Terminology:

- Cell – electrochemical unit, consisting of an anode and a cathode, capable of generating electrical current
- Battery – assembly of cells
- Lithium ion cells/batteries – rechargeable – includes lithium polymer cells/batteries
- Lithium metal cells/batteries – generally non-rechargeable

This package contains lithium cells or batteries in the following configuration (tick applicable box):

| Lithium Ion - <i>Maximum of</i> | Lithium Metal - <i>Maximum of</i> |
|--|--|
| <ul style="list-style-type: none"> • 20 Watt-hours per cell; and • 100 Watt-hours per battery <input type="checkbox"/> Cells or batteries only (ICAO/IATA Packing Instruction 965, Section II) – Cells or batteries in a package, without electronic equipment Package Limit: ≤2.7Wh = 2.5kg; or >2.7Wh but ≤ 20Wh = 8 cells; or >2.7Wh but ≤ 100Wh = 2 batteries | <ul style="list-style-type: none"> • 1 gram of lithium metal per cell; and • 2 grams of lithium per battery <input type="checkbox"/> Cells or batteries only (ICAO/IATA Packing Instruction 968, Section II) – Cells or batteries in a package, without electronic equipment Package Limit: ≤0.3g = 2.5kg; or >0.3g but ≤ 1g = 8 cells; or >0.3g but ≤ 2g = 2 batteries |
| <input type="checkbox"/> Cells or batteries only (ICAO/IATA UN 3480 Packing Instruction 965, Section IB) – Cells or batteries in a package, without electronic equipment _____ packages x _____ kg gross each | <input type="checkbox"/> Cells or batteries only (ICAO/IATA UN 3090 Packing Instruction 968, Section IB) – Cells or batteries in a package, without electronic equipment _____ packages x _____ kg gross each |
| <input type="checkbox"/> Packed with equipment (ICAO/IATA Packing Instruction 965, Section II) – Cells or batteries contained in a package with associated electronic equipment | <input type="checkbox"/> Packed with equipment (ICAO/IATA Packing Instruction 965, Section II) – Cells or batteries contained in a package with associated battery-powered equipment – with the batteries not installed in the equipment |
| <input type="checkbox"/> Contained in equipment (ICAO/IATA Packing Instruction 967, Section II) – Cells or batteries installed in equipment | <input type="checkbox"/> Contained in equipment (ICAO/IATA Packing Instruction 970, Section II) – Cells or batteries installed in equipment |

> This package must be handled with care. A flammability hazard exists if the package is damaged.
 > If this package is damaged in transportation, it must not be loaded until the condition of the contents can be verified.
 The batteries contained in this package must be inspected for damage and may only be repacked if they are intact and protected against short circuits.
 > For more information about the batteries contained in this package, call the following telephone number:

_____ List telephone number here, including area code and any applicable country code

Name / Signature: _____ Date: _____

V.1.2 Nov 2012

LITHIUM BATTERIES

Step 1 – What type of Battery are you shipping?

Lithium Ion Batteries

Rechargeable batteries commonly used in consumer electronics
Most popular battery for portable electronics like laptops, mobile phones, MP3, camcorders etc.
A fire involving lithium ion batteries can be extinguished by an aircraft halon fire extinguisher

Lithium Metal Batteries

Not rechargeable
Longer life than the normal alkaline batteries and can be used in toys, cameras, ...
A fire involving lithium metal batteries can NOT be extinguished by an aircraft halon fire extinguisher

LITHIUM ION BATTERIES

Step 2 – How are you shipping them?

Batteries packed
loose (in bulk)

Batteries packed
with equipment
(separately in the
same package)

Batteries contained
in equipment

LITHIUM METAL BATTERIES

Step 2 – How are you shipping them?

Batteries packed
loose (in bulk)

Batteries packed
with equipment
(separately in the
same package)

Batteries contained
in equipment

LITHIUM ION BATTERIES

Step 3 – How much watt per hour* does your Battery have?

Cells and
Batteries
 ≤ 2.7 watt/hour

Cells
 > 2.7 watt/hour
but
 ≤ 20 watt/hour

Batteries
 > 2.7 watt/hour
but
 ≤ 100 watt/hour

Cells
 > 20 watt/hour
or Batteries
 > 100
watt/hour

- A Cell is a single powered unit
- A Battery is a number of cells connected to each other

*The watt per hour must be marked on the outside of the battery, for batteries manufactured since January 2009. Laptops, mobile phones and other small consumer electronics have batteries with less than 100 watt/hour (except perhaps some extra duration batteries – use the formula **Ampere hours x Voltage** in case the watt per hour is not marked in the battery).

LITHIUM METAL BATTERIES

Step 3 – How much Lithium does your Battery contain?

Cells and
Batteries
 $\leq 0.3 \text{ g}$

Cells
 $> 0.3 \text{ g}$
but
 $\leq 1 \text{ g}$

Batteries
 $> 0.3 \text{ g}$
but
 $\leq 2 \text{ g}$

Cells
 $> 1 \text{ g}$
or Batteries
 $> 2 \text{ g}$

- A Cell is a single powered unit
- A Battery is a number of cells connected to each other

LITHIUM ION BATTERIES

Step 4 – How many Cells does your package have in total?

≤ 8 Cells

> 8 Cells

Note: Do not confuse package with overpack. There are no restrictions for the number of packages (and therefore cells) per overpack.

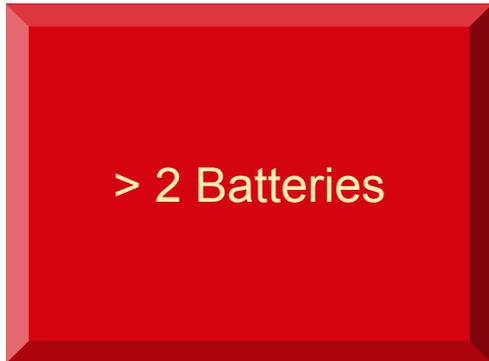

LITHIUM ION BATTERIES

Step 4 – How many Batteries does your package have in total?

≤ 2 Batteries

> 2 Batteries

Helpful note: Do not confuse a package with an overpack. There are no restrictions for the number of packages (and therefore Batteries) per overpack.

LITHIUM METAL BATTERIES

Step 4 – How many Cells does your package have in total?

≤ 8 Cells

> 8 Cells

Helpful note: Do not confuse a package with an overpack. There are no restrictions for the number of packages (and therefore Cells) per overpack.

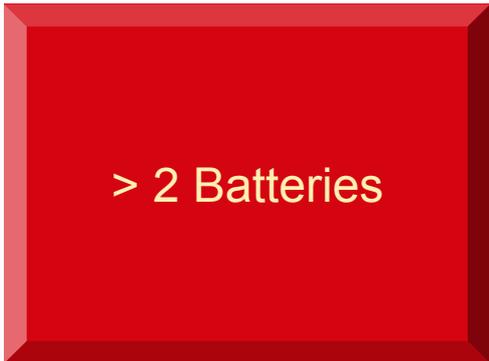

LITHIUM METAL BATTERIES

Step 4 – How many Batteries does your package have in total?

≤ 2 Batteries

> 2 Batteries

Helpful note: Do not confuse a package with an overpack. There are no restrictions for the number of packages (and therefore Batteries) per overpack.

LITHIUM ION BATTERIES

Step 3 – How much watt per hour* does your Battery have?

Cells
 ≤ 20 watt/hour
or Batteries
 ≤ 100 watt/hour

Cells
 > 20 watt/hour
or Batteries
 > 100 watt/hour

*The watt per hour must be marked on the outside of the battery, for batteries manufactured since January 2009. Laptops, mobile phones and other small consumer electronics have batteries with less than 100 watt/hour (except perhaps some extra duration batteries – use the formula **Ampere hours x Voltage** in case the watt per hour is not marked in the battery).

LITHIUM ION BATTERIES

Step 3 – How much watt per hour* does your Battery have?

Cells
 ≤ 20 watt/hour
or Batteries
 ≤ 100 watt/hour

Cells
 > 20 watt/hour
or Batteries
 > 100 watt/hour

*The watt per hour must be marked on the outside of the battery, for batteries manufactured since January 2009. Laptops, mobile phones and other small consumer electronics have batteries with less than 100 watt/hour (except perhaps some extra duration batteries – use the formula **Ampere hours x Voltage** in case the watt per hour is not marked in the battery).

LITHIUM METAL BATTERIES

Step 3 – How much Lithium does your Battery contain?

Cells
 ≤ 1 g
or Batteries
 ≤ 2 g

Cells
 > 1 g
or Batteries
 > 2 g

LITHIUM METAL BATTERIES

Step 3 – How much Lithium does your Battery contain?

Cells
 ≤ 1 g
or Batteries
 ≤ 2 g

Cells
 > 1 g
or Batteries
 > 2 g

LITHIUM ION BATTERIES

Step 4 – How many Cells /Batteries does your package have in total?

≤ 4 Cells
or
 ≤ 2 Batteries

> 4 Cells
or
 > 2 Batteries

Helpful note: Do not confuse a package with an overpack. There are no restrictions for the number of packages (and therefore Cells /Batteries) per overpack.

LITHIUM METAL BATTERIES

Step 4 – How many Cells /Batteries does your package have in total?

≤ 4 Cells
or
 ≤ 2 Batteries

> 4 Cells
or
 > 2 Batteries

Helpful note: Do not confuse a package with an overpack. There are no restrictions for the number of packages (and therefore Cells /Batteries) per overpack.

EXTRA REQUIREMENTS ACCORDING TO USG-02

Primary (non-rechargeable) lithium metal batteries and cells, (UN 3090), are forbidden for transportation aboard passenger- carrying aircraft. Such batteries transported in accordance with **Section IA and IB of Packing Instruction 968** must be labelled with the **CARGO AIRCRAFT ONLY** label.

Such batteries transported in accordance with **Section II of Packing Instruction 968** must be marked
“PRIMARY LITHIUM BATTERIES—FORBIDDEN FOR TRANSPORT ABOARD PASSENGER AIRCRAFT”

or

“LITHIUM METAL BATTERIES—FORBIDDEN FOR TRANSPORT ABOARD PASSENGER AIRCRAFT”.

EXTRA REQUIREMENTS ACCORDING TO USG-02

Primary (non-rechargeable) lithium metal batteries and cells contained in or packed with equipment (UN 3091) are forbidden for transportation aboard passenger- carrying aircraft unless:

1. the equipment and the batteries and cells are transported in accordance with Packing Instruction 969 or 970, as appropriate;
2. the package contains no more than the number of lithium metal batteries or cells necessary to power the intended piece of equipment;
3. the lithium content of each cell, when fully charged, is not more than 5 grams;
4. the aggregate lithium content of the anode of each battery, when fully charged, is not more than 25 grams; and
5. the net weight of lithium batteries does not exceed 5 kg (11 lb).

EXTRA REQUIREMENTS ACCORDING TO USG-02

Primary (non-rechargeable) lithium metal batteries and cells contained in or packed with equipment (UN 3091) and transported in accordance with **Section I of Packing Instruction 969 or 970** that do not conform to the above provisions are forbidden for transportation aboard passenger-carrying aircraft and must be labelled with the **CARGO AIRCRAFT ONLY** label.

EXTRA REQUIREMENTS ACCORDING TO USG-02

Primary (non-rechargeable) lithium metal batteries and cells contained in or packed with equipment (UN 3091) and transported in accordance with **Section II of Packing Instruction 969 or 970** that do not conform to the above provisions are forbidden for transportation aboard passenger-carrying aircraft and must be marked

“PRIMARY LITHIUM BATTERIES—FORBIDDEN FOR TRANSPORT ABOARD PASSENGER AIRCRAFT”

or

“LITHIUM METAL BATTERIES—FORBIDDEN FOR TRANSPORT ABOARD PASSENGER AIRCRAFT”.

EXTRA REQUIREMENTS (IN EXCESS OF STANDARD IATA DGR) FOR MAJOR CARRIERS/AIRLINES OPERATING IN ASIA

If shipping to/from/within Asia region, due to major Asian carriers/airlines have imposed additional and more stricter requirements (in excess of standard IATA DGR) applicable for PI967 or PI970 when there are less than/equal 4 cells/2 batteries contained in an equipment, while that shipment is exempted from labelling (lithium battery label) and additional information, it is mandatory that the DHL Express House Air Waybill must still be declared with those mandatory statement as appropriate with the Packing Instruction number herewith:

“Lithium ion batteries in compliance with Section II of PI967 (4 cells/2 batteries or less)”

OR

“Lithium metal batteries in compliance with Section II of PI970 (4 cells/2 batteries or less)”

Furthermore loose/bulk lithium metal battery shipments are forbidden from/to/within Asia (PI968).

LITHIUM BATTERIES
